

## CASE STUDY SutiAP

TPD ACHIEVED HIGHER EFFICIENCY  
WITH ACCOUNTS PAYABLE  
AUTOMATION

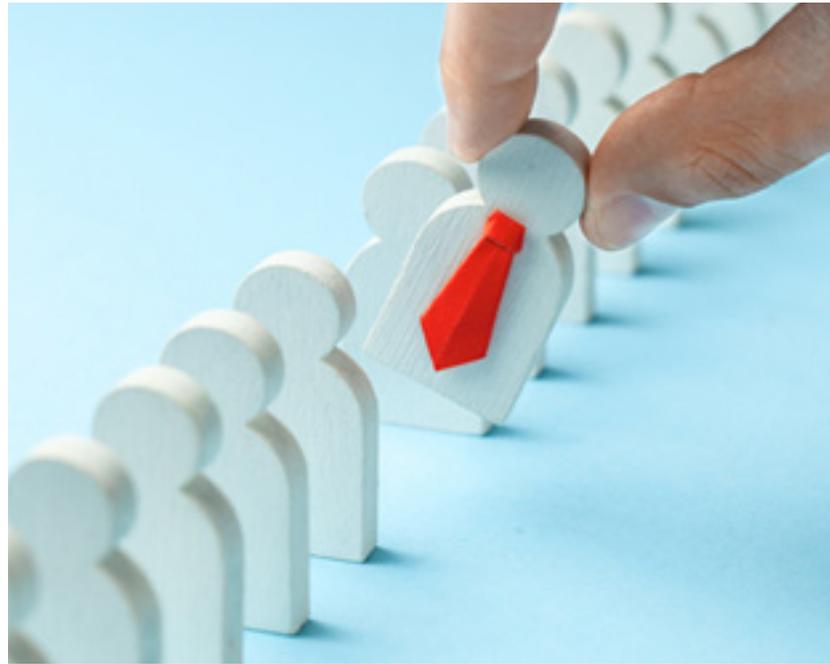

“*SutiAP helped us save \$13,000 in labor costs per year or 375 hours per year by allowing us to automate the entire accounts payable process.*”

-Leonardo Halima  
Accounting Manager

### Lack of Automation

TPD has been managing their accounts payables with manual processes, which were labor-intensive and costly. The lack of automation has made them manually enter accounting data twice or thrice into the system. This process is time-consuming, error-prone and affected their efficiency.

TPD sought to invest in an accounts payable solution that streamlines the AP process and supports multi-currency. They have considered a bunch of solutions, such as Yooz, Beanworks, SAP Concur, Sample, and Bill, but most of these solutions come with higher pricing. TPD is looking for AP software that supports dual entities across Canada & USA and multi-currency.

### Location

TPD, 595 Burrard St, Vancouver, BC V7X 1L4, Canada

### About TPD

TPD is engaged in providing total workforce solutions to its clients spread across various industries. Initially, they started as a temporary staffing agency named “The Personnel Department” on July 2, 1980. Later, they added more modules to their workforce solution, such as recruiting, temporary staffing, and payroll services, and rebranded “The Personnel Department” as “TPD” in December 2013.

## How SutiAP Simplified TPD's Accounts Payable Processes?

The integrated SutiAP solution enabled TPD to automate the repetitive tasks involved in the accounts payable process. From invoice creation, capturing, and matching to approval, the solution enabled them to automate the entire AP process and allowed them to make payments to suppliers on time.

The advanced features of SutiAP such as automated approval workflows, multi-currency support, bulk invoice approval option, and mobile application have helped TPD to process invoices effectively.

## Key Highlights

- Robust Matching engine
- Intuitive mobile app
- Invoice reconciliation & validation
- Reports & analytics
- ROI calculator
