Manual, Paper-based Invoice Management Processes Being the Key Problem

Albertsons had been tracking and processing hundreds of invoices per month with manual processes. These Excel-sheet-based processes were labor-intensive, error-prone, costly, and time-consuming. Even though they have considered many accounts payable solutions, most were just payment processing applications. Therefore, Albertsons was seeking to invest in an integrated accounts payable solution that allows them to manage and track invoices effectively.

Headquarters
M.S 10501 P.O Box 29093, Phoenix, AZ 85038.

About the Company
Albertsons is one of the largest food and drug retailers' company in the United States. The Albertsons Companies was founded by Joe Albertson, a former Safeway district manager, in 1939 with an initial investment of $12,500. Now, the Albertsons company has been operating stores across 35 states and the District of Columbia under 20 well-known banners.

How SutiAP Streamlined Accounts Payable Process?

SutiAP enabled Albertsons to automate their accounts payable process with complete control, visibility, and accuracy. The integrated software helped them automate time-consuming processes such as invoice creation, capturing, matching and approval. SutiAP solution also allowed them to make payments to the suppliers on time and helped them build and maintain good relationships with their suppliers.

With the intuitive and easy-to-use supplier portal, accounts payable teams can easily monitor and track suppliers' performance across the supply chain lifecycle. Plus, the flexible matching engine with 2,3, and N-way matching options has helped them automate the invoice, purchase order, and receipt data and allowed them to make payments to suppliers on time.

Benefits

- Monitor and track suppliers effectively.

- Capture, validate, and approve invoices on the go.

- Create, manage, and track invoices/POs effortlessly.

- Automate invoice management processes.

- Match invoice, purchase order, and receipt data with our flexible matching engine.
